Research Center and Institutes

The Policy Studies Center (PSC) is an interdisciplinary center that focuses on service, policy issues, and applied research in the areas of demography, criminal justice, public administration and social work. The PSC is dedicated to providing service and outreach, fostering community, cultivating an environment of integrity, excellence, inclusiveness, respect, collaboration, innovation and transparency, and educating and training leaders.

Institute for Demographic and Socioeconomic Development (IDSER) provides multidisciplinary research and development services that encompass various themes. Our research focuses on the social and economic characteristics of population and the effects of population change. The institute is comprised of specialized researchers in various fields of expertise.

The Water Institute of Texas (WIT) was established to conduct research on the various factors related to water sustainability and their effect on the health and economic development of Texas and the Southern USA. Researchers focus on five key areas: Managing the current water supply, developing innovative water sources, enhancing water quality, carrying our community outreach and education, and studying demographics/economics of water.
